

# MATHIEU HENRIJEAN

## ABOUT ME

I am a 25 years old Web & Graphic Designer. I was born, lived and studied in Brussels, Belgium. After spending three years studying Economics at the Brussels University I decided that I was not shaped for this type of work. I had to create things, especially in the web field where I think the future belongs. So I enrolled at C.A.D (College of Advertising and Design) where I learned a lot. In this cursus, each year we had to do internships to face professional real life environment and projects. Now I work remotely as a freelance, working on different project at the same time. This industry is moving constantly so I kept this desire of learning, and I always will.
